Profile Summary

Gen AI Engineer with experience building and deploying AI powered enterprise solutions using Large Language Models (LLMs), AI automation workflows, FastAPI, Python, React, and cloud native architectures. Contributed to the development and deployment of industrial AI solutions through the iR2D.ai platform for enterprise clients including Airbus and Siemens Energy. Strong expertise in backend engineering, API integrations, AI assisted workflows, scalable system design, and secure cloud deployments.

Work Experience

Gen AI Engineer

Tata Consultancy Services Limited

Dec 2025 – Present

Nagpur, Maharashtra, India

- Contributed to the development and deployment of AI powered enterprise solutions on the iR2D.ai platform for global clients including Airbus and Siemens Energy. Worked on integrating Generative AI workflows, backend APIs, and cloud native services using Python and FastAPI to support AI driven enterprise applications. Collaborated with Agile teams on deployment, monitoring, testing, and optimization of scalable AI solutions using Git based workflows and CI/CD pipelines.

Projects

ThermalBill – Full Stack Restaurant Management System

[GitHub](#)

- Architected and implemented a full stack restaurant billing and management system with React based frontend, backend APIs, Redis caching, and cloud storage on AWS, improving response consistency and supporting multi role operational workflows.

SecureMedicose – Encrypted Health Records Platform

[GitHub](#)

- Developed a secure health records platform with backend APIs, encryption, authentication, and role based access control, resulting in a patented solution for secure healthcare data handling.

VulneraTrack – Real Time Security Vulnerability Scanner

[GitHub](#)

- Built a browser based security scanning application integrated with backend logic to identify common web vulnerabilities in real time and generate actionable security insights.

Education

Shri Ramdeobaba College of Engineering and Management

Bachelor of Technology in Computer Science (Cyber Security)

Aug 2021 – May 2025

Nagpur, Maharashtra

- Served as Secretary and Joint Secretary of the Cybersecurity Students' Executive Council and as Class Representative for 4 semesters. Organized AARHANT'23, a cybersecurity awareness event with participation from over 1500 students.

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, SQL.

Generative AI & AI Technologies: Large Language Models (LLMs), OpenAI APIs, Prompt Engineering, Retrieval Augmented Generation (RAG), AI Automation Workflows, AI Powered Enterprise Applications.

Frontend Technologies: React, JavaScript Frameworks.

Backend Technologies: FastAPI, Node.js, REST APIs, API Integration, Microservices Architecture.

Cloud and DevOps: AWS (S3, EC2, Lambda, API Gateway), Docker, CI/CD Pipelines, Git, GitHub Actions.

Databases: PostgreSQL, MySQL, Redis.

Core Concepts: System Design Fundamentals, Object Oriented Programming, Data Structures and Algorithms, Agile Scrum.

Security: JWT, OAuth, AES and RSA Encryption, Secure API Architecture.

Certifications

- Google Project Management Professional Certificate, Coursera (2024).
- Google IT Support Professional Certificate, Coursera (2024).
- Zero Trust Cloud Associate, Zscaler (2024).
- Patent: A Secure Health Data System, Indian Patent Office (2024).
